First Steps

- The Driver App is an interactive app with the main functions of order managment and communication between the driver and the contractor during the transport incl. tracking.
- This app is free of charge and needs a registration with user name and password. It can only be used by subcontractors and drivers who are assigned by the contractor.
- The usage of the app needs special rights, can cause costs for data usage (depends on the mobile phone contract) and is designed for mobile devices with a permanent network access.
- Please use our Online-Manual for more information.

You can download the app with your smartphone here:
